

A detailed photograph of a hummingbird in flight, showing its wings and iridescent feathers. The bird is positioned on the right side of the page, facing left. A white circular line is drawn around the lower part of the bird, framing the text below.

NIPPER AGV V4

Agile  
Compact  
Autonomous

## Meet the Nipper AGV

# This is how agile your production logistics could be

The Nipper AGV is the proven solution for automated pallet transport in any production environment. Discover our intelligent pallet truck. Together, we will make your factory smart!

### **Manoeuvrable in tight spaces**

We offer the most compact AGV for horizontal pallet transport. The omni-directional drive system allows the Nipper AGV to move in any direction. The Nipper AGV can easily move weights of up to 1,200 kg and navigates tight spaces with ease.

### **Meets the strictest safety requirements**

Safety plays an incredibly important role in any manned production environment. The Nipper AGV meets the strictest safety requirements, such as ISO 3691-4. So you prevent accidents and damage.

### **Smart human-robot interaction**

The Nipper AGV is designed for optimal cooperation with humans. The Nipper AGV communicates with employees in the production environment via light signals. This way, employees can always see the direction of travel and status of the AGV. The AGV also shows that it has spotted an employee and displays the distance to the employee through a stoplight colour scheme. These interactive elements make the Nipper AGV a reliable colleague you can count on.

### **Saves time and money**

With our AGV, you save on man-hours, realise constant availability (24/7) and achieve ROI within 12 months! We offer a scalable and flexible solution that requires no infrastructure and can be installed quickly. Thanks to our training courses, you are able to adjust the settings of the AGV yourself to changes in the production process.

**Smart move**

## Meet Nipper

# Nipper production logistics

We shape the future of your internal transport and packaging process. In addition to innovation, determination, and a shift in approach, this requires close cooperation. We invest in solid partnerships whereby we approach your challenges as if they were our own. Jointly becoming smarter, more autonomous, and more flexible. That is our ultimate goal. **Nipper. Smart move.**

### Here's why a collaboration really is going to help you.

Our compact building blocks can be integrated into any existing production environment, including yours.

Nipper ensures your internal transport and packaging process is ready for industry 4.0, which is crucial for your success.

There is no risk involved for you, as we always offer an appropriate test. Free of charge and without any obligation.
